

## GLOBAL CERTIFICATIONS

### Tested and certified for buildings all around the world.

The construction market worldwide demands certified and code compliant products. FRAMECAD® continuously ensures that we introduce innovative solutions with certifications to satisfy our international clients located in over 118 countries.

FRAMECAD® technology, manufacturing cold-formed steel system, and component parts can be confidently used for buildings anywhere in the world because they have been independently certified by the world's most recognized and accredited quality assurance systems and organizations.

### Associations and affiliations

FRAMECAD® actively participates in key industry organizations. Through this active involvement, we stay up to date with trends, technological advances and industry best practice, in addition to strengthening trade relationships and developing industry standards.

### Why is this important?

Building industry experts and government authorities in many regions around the world have collaborated to develop common standards for building products and construction techniques. Construction standards have now become so important that in many countries, it is not possible to build with products that have not been independently verified and carry a recognized certification mark.
